Mid-Level Software Engineer | Full Stack & Mobile | Application Security (AppSec)

PROFESSIONAL SUMMARY

Mid-Level Software Engineer with a solid foundation in Full Stack and Mobile development, specializing in creating scalable and secure applications. With strong experience in the Flutter, JavaScript, and Node.js ecosystems, I combine software engineering with advanced Cybersecurity principles (AppSec, DevSecOps, OWASP Top 10) to protect systems at scale. I have a proven track record of maintaining and publishing over 200 applications, along with solid experience in API integration, Clean Architecture, and immersive interfaces supported by a previous background in UI/UX Design. Focused on developing end-to-end solutions that transition efficiently from the database and network architecture to the final user layer.

TECHNICAL SKILLS

- **Mobile & Web Development:** Flutter, BLoC/Cubit, Node.js, JavaScript, TypeScript, Java 17, HTML, CSS, WordPress.
- **Architecture & Integration:** Clean Architecture, REST APIs, Firebase, TCP/IP, System Integration.
- **Information Security:** OWASP Mobile & Web Top 10, SAST, Mobile App Hardening, Obfuscation & Binary Shielding, Security at Scale.
- **DevOps & Tools:** Git, GitHub, CI/CD, Kanban, Figma.
- **Soft Skills:** Assertive communication, Teamwork, Complex problem-solving.

PROFESSIONAL EXPERIENCE

Mid-Level Software Engineer (Full Stack & Mobile)

FoxAppy | November 2024 - Present

Working in the Mobile ecosystem (Flutter) and Web/Backend integrations using Node.js, JavaScript, and Firebase.

- Maintenance, support, and security updates for a portfolio of over 200 published applications.
- Development of complex retention and conversion features: virtual fitting room, prize roulette, cashback, refer-and-earn system, and community/blog tab.
- Implementation of advanced interface experiences, including alternative Liquid Glass menu for Android, in-app stories, and dynamic product widgets.
- Creation of preference-based personalization logic (e.g., favorite sports team) for automated targeting of segmented promotional campaigns.
- Practical application of AppSec concepts (Mobile App Hardening, Obfuscation, SAST), mitigating vulnerabilities before build publication.

Front-End Developer (Freelance)

Upside Inteligência Web | August 2024 - January 2026

- Development and prototyping of responsive web interfaces focused on usability using HTML, CSS, JavaScript, and Figma.
- Building and maintaining WordPress platforms, ensuring performance optimization (Core Web Vitals) and SEO best practices.

Brand & Digital Designer / Marketing Designer

Agência Kottler / CHA Social | Previous Experiences

- Strategic role in developing visual identities and graphical interfaces, building a solid UI/UX background applicable to current software architecture.

ACADEMIC EDUCATION

- **Postgraduate in Cybersecurity** | Wyden (UniFavip)

February 2026 - Expected: February 2027

- **Bachelor's Degree in Systems Analysis and Development (ADS)** | Universidade Cruzeiro do Sul

April 2022 - August 2024

Global average of 8.5, with maximum distinction (grade 10) in Computer Networks, Object-Oriented Programming (OOP), and Programming Logic.

LANGUAGES

- **Portuguese:** Native.
- **Spanish:** A2 Level (Basic comprehension, reading, and conversation).
- **English:** A1 Level (Technical reading / Currently taking an improvement course).
